1952

CUMULATIVE SERVICE BULLETIN INDEX COVERING BULLETINS ISSUED FROM SEPTEMBER 1947 TO AUGUST 1952 NUMBERS 193 TO 266 INCLUSIVE

This Service Bulletin index lists articles which appeared in Service Bulletin Nos. 193 through 266 covering both passenger cars and trucks. It should be filed in a binder containing those issues of the Service Bulletin. Service Bulletin Nos. 169 through 192 should be filed with index Bulletin No. 241A in another binder.

The index is compiled alphabetically by article title or subject, and liberally cross-referenced.

Immediately following the reference title the Service Bulletin number and the page on which the article appears are given; also the vehicle models to which the article applies. Model references are always given inclusively so that "9G" indicates that the article applies to the 7G (1948), 8G (1949), 9G (1950), 10G (1951) and 12G (1952) Champions. In the reference to models, the word "All" Means the article refers to all of the models listed in the following paragraph.

Individual model numbers refer to the following vehicles:

Champions		Commanders		Trucks	
7G	1948	15A	1948		1948
8G	1949	16A	1949		1949
9G	1950	17A	1950	2R Series	1950
10G	1951	H	1951		1951
12G	1952	3H	1952		1952

In such cases where an article refers to models of earlier production than those listed above, the earlier model designation is also given.

In each future year, that year's accumulation of Service Bulletin material will be added to the Index and the oldest year's material dropped, thus giving an index always covering the last five production models at the time of publication.

NOTE

If you do not find the reference you want in this Index, be sure to look in Index Service Bulletin No. 241A.
